

MUSTAFIZUR RAHMAN

Senior Software Engineer — Full-Stack (Node.js · PHP · React/Next.js)

Dhaka, Bangladesh | +880 1556 984227 | mustafiz.info13@gmail.com

linkedin.com/in/musfiz | github.com/musfiz | musfiz.com

PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years building and shipping production web applications, backend-focused, across PHP, Node.js, and JavaScript/TypeScript ecosystems. Experienced owning features end-to-end — from database schema and REST API design through to frontend delivery and deployment — using React, Next.js, Vue, and Nuxt.js. Strong background in relational database programming (MySQL, PostgreSQL, MSSQL), third-party API integration, and code review. Comfortable working in Agile teams, mentoring on code quality, and using AI tools to speed up delivery without compromising on testing or engineering rigor.

CORE SKILLS

Languages: PHP, JavaScript, TypeScript, SQL

Backend: Node.js, PHP (Laravel), REST API design, authentication & authorization, background jobs, third-party API integration

Frontend: React, Next.js, Vue.js, Nuxt.js, Angular, HTML, CSS, responsive UI/UX

Databases: MySQL, MSSQL, Oracle (schema design, transactions, complex queries)

Practices: Agile/Scrum delivery, code review, testable/well-designed code, object-oriented design, system improvements & performance

Tooling & AI: Git, CI workflows, prompt engineering for AI-assisted development, translating product requirements into AI/engineering tasks

PROFESSIONAL EXPERIENCE

Senior Software Engineer *Oct 2021 – Present*

Bangladesh Japan Information Technology (BJIT) | Dhaka, Bangladesh

- Developed and implemented software solutions for diverse business needs using PHP, JavaScript, and Node.js, owning features from design through deployment.
- Translated high-level product requirements into detailed prompts and actionable AI-assisted engineering tasks, improving delivery speed without sacrificing code quality.
- Designed, developed, tested, and deployed high-quality applications following Agile methodology.
- Integrated third-party APIs into existing systems to streamline data exchange between applications.
- Performed code reviews across the development team to ensure quality, consistency, and adherence to standards.

Software Engineer *Mar 2020 – Oct 2021*

Bangladesh Japan Information Technology (BJIT) | Dhaka, Bangladesh

- Designed and implemented software solutions using React, Vue, Angular, Next.js, and Nuxt.js.
- Maintained databases by writing complex SQL queries across relational systems (MySQL, PostgreSQL, Oracle, MSSQL)
- Applied object-oriented design principles to build high-quality, reusable software components.
- Wrote well-designed, testable code as part of a cross-functional Agile team.

Software Engineer *Oct 2019 – Mar 2020*

Nano Information Technology (Nanosoft) | Dhaka, Bangladesh

- Developed and implemented software solutions using Agile methodology, PHP (Laravel), JavaScript, HTML, and CSS.
- Applied object-oriented design principles to deliver high-quality software components.
- Provided ongoing support for end users, resolving issues related to deployed production applications.

SELECTED PROJECTS

- Enhanced Video Management System (e-VMS) — Cloud application enabling unified operation of surveillance cameras deployed across wide areas. (amnimo.com/en/service/e_vms) (Tech Stack: Vue Js)
- Device Management System (DMS) — Cloud platform for remote maintenance and operation of IoT devices and cameras. (amnimo.com/en/service/dms) (Tech Stack: AngularJs v20)
- Role Access Portal - Application that manages RBAC through microservice using their internal operation or top management from japan side. (Tech Stack: React, Aws Amplify, Zustand etc)
- Operation Portal - Application that uses for overview, client tenant registration, devices assignment, manage user etc (Tech Stack: Angular 20)
- Online Counseling System — Web platform for scheduling and managing counseling sessions for japan. (Tech Stack: Vue js, Laravel)
- TSO Reservations System — Reservation and booking management application for japan. (Tech Stack: Vue js, Laravel)
- ERP Software for BCS Administration Academy — Enterprise resource planning system for academic administration. (Tech Stack: Laravel)
- Clinic & Billing Management System (Jhumu Khan's Laser Medical Center) — Patient records, scheduling, and billing management.
- Multivendor E-commerce Platform (Laravel) — Multi-seller online marketplace built with PHP Laravel and so on

EDUCATION

B.Sc. (Honor's) in Computer Science and Engineering (CSE)

Institute of Science & Technology — Affiliated with National University
15/A, Dhanmondi, Dhaka-1209, Bangladesh
